

Tranceplayer™

First Person Media Player (FPMP)
Digital Concert Space (DCS)

A new trend...

As music becomes increasingly inaccessible due to subscription models, pay to play, and social media sharks and while support of physical music continues to decline we are losing our voice and our reason for existing as music makers.

It seems more and more that people with money listen and play, and those who don't will miss out without replacement. That isn't okay.

I want to encourage the Exist arena to be free and available and for us as musicians to be heard and valued. We can do that for each other.
